

# GR DESIGN AND CONSTRUCT

## Issue Five

**GET YOUR 08/09 PROJECTS UNDERWAY WITH GRDC TODAY!**

*GR Design & Construct Restrooms are designed to suit your needs, choose from a range of roof shapes, internal and external cladding, toiletware and alternative waste systems to design your own custom restroom.*

### Size

Choose from a small Single Disabled Structure to a large Toilet/Shower block encompassing both laundry and storage facilities. The size of your restroom will depend on the location and how frequently it will be used.

### Roof Shapes

Change the look of your restroom by choosing a roof style that suits the surrounding environment and any existing structures. Choose from Skillion, Gable, Pitched or Curved Roof Shapes.

Twin Disabled with Hybrid Waste System

Twin Disabled with Gable Roof

### Internal / External Cladding

A range of Internal and External Cladding can be used including Custom / Mini Orb, Colourbond, Stained Shadowclad (Ply), Compressed Fibre Cement Sheet, Waterproof Panels or Weatherboards.

### Fixtures & Fittings

Dress your restroom up or down by choosing from our selection of Stainless Steel, China or Galvanised Fittings & Fixtures. We only supply toiletware and architectural hardware options that comply with current Australian Standards.

### Waste Systems

Water tanks and alternative waste systems are ideal in remote or less developed areas. The 'Hybrid' system is the market leader in onsite EPA approved treatment and discharge units with the capacity and arrangements to handle a combination of peak and off peak usage.

### Shrooms

Combining the features and benefits of shelters and restrooms, Shrooms are an excellent alternative to the standard Restroom offering a mix of amenities, picnic facilities, seating and protection from the elements. Shrooms are ideal in remote or rural locations.
