March 2015

Australand MDG — Berwick Waters Estate

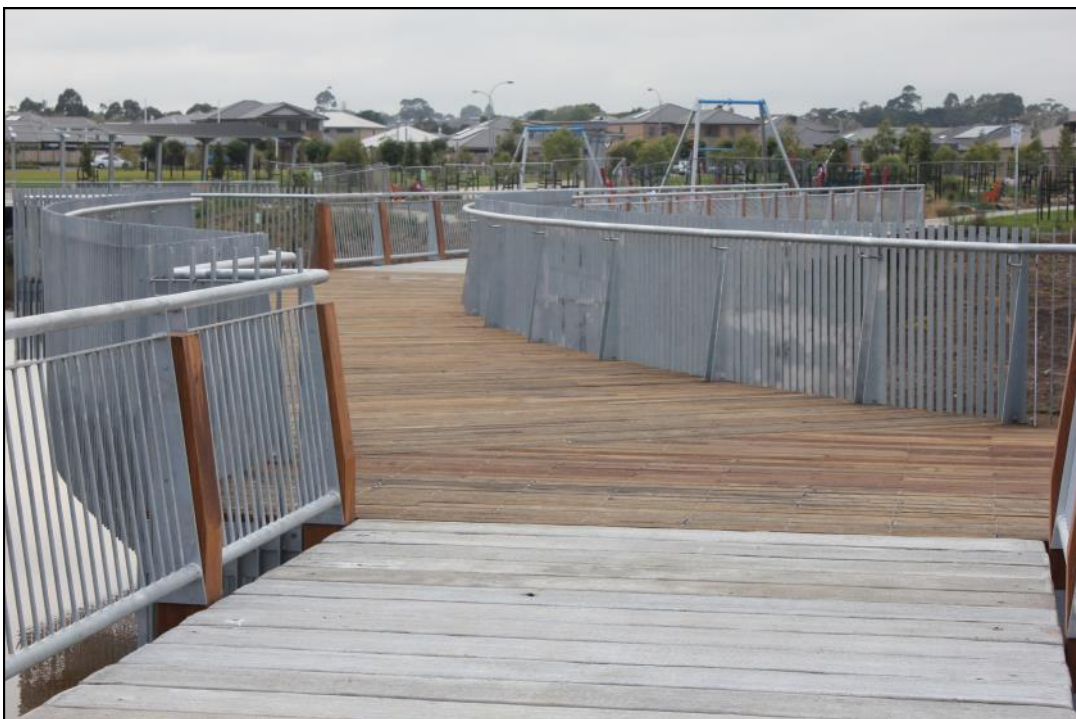

Tract Consultants came to GR Design and Construct with a concept plan of a sophisticated pedestrian bridge for Berwick Water Estate. GR worked closely with Tract and the developer Australand to come up with a practical bridge that maintained the original design intent. Once the design had been finalised shop drawings and engineering were undertaken, when this was finalised a firm price was submitted.

Curved Bridge Section, viewing decks and approaches:

- ◆ Hot Dipped Galvanised steel I-Beams, Bearers and Joists
- ◆ Steel Balustrade as detailed
- ◆ Hot Dipped Galvanised steel screw piles
- ◆ Hardwood Decking
- ◆ Solid HWD posts to handrail
- ◆ Precast concrete decking to approaches
- ◆ Crane Hire
- ◆ Screw piles installation
- ◆ Onsite labour
- ◆ Melbourne Water liaison

A great example of a successful design and construct contract!
