- Crane Hire
- Leave site clean and tidy

GR Design & Construct and Insite Architects worked together to deliver this all abilities 1D restroom at Point Impossible, Victoria.

The restroom was installed on a "Hybrid" alternate waste system as there was no sewer available.

This is a water based treatment system that breaks the waste down to grey water and has EPA approval to flow to ground.

GRDC originally undertook a feasibility study for Tract Consultants for a 31M x 2.5M pedestrian footbridge at Settlers Hill, Mernda. This study consisted of design, engineering, soil report, surveying and Melbourne Water correspondence.

Upon completion, GRDC could provide a firm price to the client for the construction and delivery of the pedestrian footbridge.

In short, GRDC gathers all the appropriate information upfront for a smooth supply and installation contract.

COMPLETE PROJECT MANAGEMENT

Gable Shelter & Gazebo - City of Greater Geelong - Pettit Park

GRDC has a range of standard shelters available that have been drawn and engineered.

The benefit of this is there are no engineering fees paid by the client and lead times are reduced considerably.

These shelters come in a range of roof shapes, sizes and materials. These shelters can be flat-packed for supply only or GRDC can arrange for quick economical installation.

GRDC also specialises in custom structures. So no matter how kooky your ideas may be, you can come to us.

Visit the photo gallery on our website for the latest custom designs
