‘ A good looking project on time and on budget’

Wellington Shire Council

- Wellington Shire Council approached GR to deliver a custom bus shelter at sale which was in line with two previous shelters we designed, fabricated and delivered the financial year before. The existing design needed to be tweaked to incorporate painted steel frames and toughened 10MM glass. In this instance GR supplied the product flat packed, ready for assembly by a local builder.

‘Great looking product in no time at all’

Moreland City Council

- GR Supply and install a range of public amenity building to local government and developers alike. Coburg Lakes in central Melbourne has a dilapidated brick building which we demolished as part of our scope of works. GR then supplied and installed a new fully compliant 1D2A skillion roof restroom. This restroom had sewer and water to the footprint and lights and auto timer locks are powered by a solar panel.

Melton Shire Council

GR won this 60M Bridge walk for Melton Shire Council, Little Blind Creek at tender stage. Post tender there was some tick-tacking to finalise design and in particular the handrail detail with council. During the drafting and engineering phase GR applied for Melbourne Water and Cultural heritage permits. Fabrication and installation went smoothly with road closure permits required for the main bridge section lift.

‘Custom Projects...? No dramas’

City of Ballarat

Major Projects needed a ticket box designed and installed within six weeks to accommodate the looming Soccer match to be held at Morshead Park between the new Melbourne Franchise and Sydney City. GR worked through the design criteria with council then designed, engineering, fabricated and installed the ticket box.

‘GR can work into the design a range of roof shapes, floor plans and cladding materials’
