

DESIGN AND CONSTRUCT

GR DESIGN AND CONSTRUCT

Special points of interest:

- Designed & Built to be consistent with surrounding environment
- Project completed within council's time and budget constraints
- Incorporates BBQ & utilizes water saving devices

This months Completed Projects

Pitched Roof Shelter
Shepparton Christian School

Gazebo Shelter
Lincoln Park, Nth Essendon

Viewing Platform
Morningside Estate

FRANK MANN RESERVE, CERES

Just north of the City of Greater Geelong, Frank Mann Reserve is nestled in the historic township of Ceres and is yet another example of Gunnersen Recreation's ability to complete projects from concept to completion.

From Geelong City Council's initial brief to design and build a structure consistent with the surrounding environment, this structure was completed on time and within budget.

Custom Shelter Frank Mann Reserve, Ceres

The large shelter incorporates an electric BBQ and utilizes water saving devices such as a rainwater tank. Consideration was also given in designing to match surrounding building and parkland areas.

Contact Gunnersen Recreation for more information on this project or for details on how your next project can be completed with our own comprehensive range of designs or built to your design requirements.
