## GR DESIGN & CONSTRUCT

Issue Eleven

### GRDC'S LATEST PROJECTS

GRDC recently designed this footbridge that is able to handle substantial flood loads but didn't dominate the surrounding area. These two 8x2.5m Steel Footbridges featuring collapsible handrails were completely fabricated at our Port Melbourne factory and transported and lifted into place over Sheepwash Creek in Strathfieldsaye. They look great and if there is ever a flood in the area the collapsible handrails will minimise the impact of any lateral water loads..

Another current project under construction is the extension of the Balcombe Estuary Boardwalk at Mt Martha. Demolition of the old boardwalk began last month and we are working in an environmentally sensitive area it was a very delicate operation! Once the old boardwalk was removed, work began on installing 340 metres of new boardwalk. Made from treated pine the boardwalk includes the addition of passing bays, junctions and fishing platforms

As well as highly engineered structures, GRDC can also supply you with a simple shelter such as this 3 x 3m Gable End Picnic Shelter recently installed along the Barwon River in Geelong. The recycled timber posts are old telephone poles sourced from a timber wholesaler in the fire effected Kinglake area and were used to match the existing shelters situated by the river.
