

# GR DESIGN & CONSTRUCT

Issue Nine - February 2009

## CUSTOM AND STANDARD STRUCTURES BY GRDC

**GRDC has a large range of standard restrooms or let us design one to suit your individual requirements**

- Contact GRDC to help you finish your 08/09 financial year projects on time and on budget.
- Call us today to discuss your next open space project!

**Ph: 1300 733 492**

This Custom Shroom (Shelter / Restroom) was designed and constructed in conjunction with local Council. Comprising of a ID Restroom facility with service duct, all stainless hardware, pans and cisterns, this shroom was connected to mains sewage. There is also ample room for picnic tables and seating which are protected from the elements. Ideal for walking trails, remote bus stops and recreation reserves.

Shrooms can be designed to suit your individual needs.

GRDC designed this 2D restroom with service duct to fit in with the surrounding infrastructure. External cladding, painted shadow clad, internal painted fibre cement sheeting and manor red steel posts.

All GRDC restrooms comply with current Australian Standards.

Royal Botanic Gardens, Cranbourne required a large restroom facility but there was no mains sewer available to connect to. This custom hybrid alternate waste system was the perfect solution with one large primary tank (under the suspended slab) a secondary tank and one holding tank. The hybrid system is a water based treatment facility ideal for remote and environmentally sensitive locations and maintenance free.
